Today’s Training!

- Agenda
- Logistics of zoom
- Chat for questions
- Introduce Partners:
  - National Bighorn Sheep Center: Sara & Karen
  - Wyoming Game and Fish Department (Lander Regional office): Amy & Shelby
How to Help Bighorn Sheep

- Background of the project itself
- Our education mission at the National Bighorn Sheep Center
- Context of citizen science and YOUR role
- Real-life implications and impacts of your observations
How to Help Habitat

- Action Item resulting from Whiskey Mountain Collaborative project
- Invasive species are one of the leading causes of declines in habitat quality
- Knowing where invasive species are and instituting an Early Detection/Rapid Response (EDRR) methodology helps reduce the spread.
- Coordinate with Fremont County Weed and Pest to help with inventory and treatment.
- Please get out and observe, observe, observe, and record any invasive species you see, especially the ones we will show you here using the iNaturalist App, and the Dubois Invasive Species Watch Project.
- We have several volunteer days planned in the coming months to help us inventory invasive species on Torrey Rim, the first of which is June 17. Let us know if you would like to help.
Cheatgrass
Balkan or Dalmatian Toadflax
Broadleaved or Perennial Pepper-weed
Creeping or Canada Thistle
Heart-podded Hoary Cress or White-top
Spotted Knapweed
Russian Knapweed
Musk Thistle
Oxeye Daisy
Leafy Spurge
Dubois Invasive Species Watch is a Citizen Science Project to help land managers identify the extent of invasive species in the area surrounding Whiskey Basin Wildlife Habitat Management Area. Bighorn sheep are a community-wide iconic wildlife species that depends heavily on intact winter range and migration corridors. Rapidly responding to invasive species infestations will help maintain habitat for this and other wildlife species in the area.
Getting Started with iNaturalist
Join the largest group of naturalists in the world!

With Spring Comes Emerging Invasives
The cool winter is beginning to feel like a distant memory: temperatures rise, soil thaws, and green sprouts speckle our mountains and meadows, alongside our fellow...
