

# SUGGESTED PHOTOGRAPHIC EQUIPMENT CHECKLIST

## Wind River Photographers Retreat

Bring what you have. Rent what you need. Be certain to practice with any new equipment if possible. Not everyone will have everything on this list and you may not get the chance to use everything you bring. This is a comprehensive list for you to customize for the kind of photography you do.

### Photographic Equipment:

- Camera body or two AND their MANUALS
- Lenses you love including wide, telephoto and macro (the longer the better for wildlife and to isolate subjects)
- A STURDY tripod that you know how to use with a head that is second nature (practice)
- Quick release plates and the wrenches you need to tighten them
- Freshly charged batteries, spare batteries and chargers
- Polarizing filter and neutral density filters
- Memory cards and more memory cards (unless you are going to download every night)
- Equipment rain gear, absorbent towel just in case!
- Cleaning items/tools (make sure to clean your equipment/sensor before you arrive)
- Camera bag or backpack with room for your snacks (possibly clothing layers, rain gear)
- Hoodman loupe (helpful for viewing detail on your LCD screen)
- Bean bag or other stabilizing device (when shooting from your vehicle)

### Other Equipment:

- Laptop, portable external hard drives, memory card reader and a flash or thumb drive (for quick transfer)
- Sunglasses, prescription eye glasses
- Binoculars or spotting scope (optional)

**Please make sure to be prepared. All participants will appreciate your effort! Thanks!**
